1. Subscription Floating License

The Subscription Floating License offers endless software updates and unwavering support. Designed for ultimate flexibility, this license can be applied to an unlimited number of devices. Its design facilitates smooth transitions between different versions of computers and operating systems, including Windows, Linux, or OSX, making it ideal for various computing environments and quick switching to another computer. The license is based on an annual subscription. Upon expiration, it is necessary to request a new activation key.

* Offline Activation:
For the activation of your 'Subscription Offline' license, we offer a simple process that does not require an internet connection. By using the 'Export Request File' (ERF) from your computer, your license is securely activated directly on your computer. This ensures that your data is protected and that only you have access to your license.
It is important to note that this type of activation permanently binds the license to your computer. This means that once activated offline, the license remains on that computer and cannot be transferred to another. While this ensures a high level of security, it is important to bear in mind that this reduces the ability to move the license to another computer.

2. Life-Time Permanent License

The Life-Time License, a unique investment that provides continuous access to software updates and dedicated technical support. Once activated, this license seamlessly integrates with your device's hardware, establishing a permanent connection with your current computer.
Whether you reinstall ITVDesk, your license will always remain valid.
Thinking about upgrading your hardware?
Request the transfer of your existing online license or purchase a new one to maintain consistent access to the exceptional services of the ITVDesk application.

* Offline Activation:
For the activation of your 'Subscription Offline' license, we offer a simple process that does not require an internet connection. By using the 'Export Request File' (ERF) from your computer, your license is securely activated directly on your computer. This ensures that your data is protected and that only you have access to your license.
It is important to note that this type of activation permanently binds the license to your computer. This means that once activated offline, the license remains on that computer and cannot be transferred to another. While this ensures a high level of security, it is important to bear in mind that this reduces the ability to move the license to another computer.

IN THE INTEREST OF PROVIDING CLARITY AND TRANSPARENCY REGARDING THE USE OF OUR LIFE-TIME LICENSE, WE WISH TO OFFER YOU DETAILED INFORMATION ABOUT THE CONDITIONS UNDER WHICH YOU CAN USE THE LICENSE AND HOW IT DIFFERS FROM OUR SUBSCRIPTION FLOATING LICENSE MODEL.

The LIFE-TIME license is directly linked to the hardware components of your computer. This form of licensing takes into account unique identifiers of your equipment, such as, but not necessarily limited to:

- CPU processor
- Working memory, RAM
- Hard drive
- BIOS
- Network card
- Motherboard

The LIFE-TIME license allows for up to two transfers of the license to another computer under the following conditions:

1. A free transfer is possible within the first 6 months of license activation. During this period, if there is a change in hardware or computer, you can transfer the license for free, provided it involves the online activation of the previous license.

2. A paid transfer is available after more than 6 months have passed since the license activation. If you request a paid transfer, we will cancel your old license and provide you with a new replacement license at a 50% discount, provided it involves the online activation of the previous license.

We note that in the event of any changes to the above-mentioned components after the expiry of the 6-month period, the LIFE-TIME license is canceled, and a free transfer is not possible.

Additionally, we want to emphasize that changes to peripheral devices such as mice, keyboards, monitors, USB peripherals, and similar do not affect the status of your license. Verification during activation or transfer of the license refers exclusively to the hardware components listed. Replacement or upgrade of peripheral devices will not cause cancellation or the need for reactivation of your LIFE-TIME license.

Also, we wish to highlight that reinstalling the Windows operating system will not affect your license. The verification process does not take software changes into account, so reinstalling Windows will not require reactivation or transfer of the license.

Unlike the LIFE-TIME license, the Subscription Floating License model offers greater flexibility as it can be transferred without additional costs at any time, regardless of changes in hardware components or computers.

HERE ARE THE STEPS TO ACTIVATE YOUR ITVDESK LICENSE AUTOMATIC ONLINE, WHICH YOU CAN USE AS INSTRUCTIONS:

1. Visit the Web shop:

   The user should visit the Web shop at: www.itvdesk.eu/shop.
